Organize and Thrive: Achieving Organizational Excellence in the Practice

Are you grappling with maintaining efficiency and harmony in your dental practice? Are you looking to transform from a state of chaos to a streamlined model of organizational excellence? Do you have turnover and feel like you can't get your practice in flow?

This hands on course is for YOU! Discover the transformative power of organization within your dental practice in our interactive workshop, "Organize and Thrive: Achieving Organizational Excellence in the Practice." Designed for dentists and dental professionals eager to elevate their practice, this course will guide you through the fundamentals of organizational structure, focusing on resilience, performance, and teamwork. With a mix of experienced knowledge and practical application, you'll spend the morning exploring the pillars critical to organizing a successful practice. The afternoon will be dedicated to hands-on activities that will organize your practice's operational infrastructure, ensuring you leave with actionable tools and strategies. Prepare to empower yourself and your team with the knowledge to implement immediate organizational tools, laying the groundwork for a more efficient, harmonious workplace. This hybrid course is a gateway to transforming your dental practice from a place of chaos to a model of organizational excellence, empowering you and your team to thrive.

Lecture and Hands-ON Workshop

Brain Hack Your Business

Do you feel like a zombie after a day at work? Do you work with individuals that you sometimes don't understand? Do you sometimes feel misunderstood?

Did you know that our brains use about 20% of our body's energy each day? If we are working in an unorganized, inefficient workplace, where people don't understand each other that number could be even higher.

In this evidence-based, empowering course, participants will explore strategies rooted in cognitive behavior and self-discovery that will improve efficiency, elevate culture, build relationships and enhance customer service...all while conserving energy.

Attendees will discover the key pillars of business operations and a method for organizing your systems and processes that is user-friendly and efficient. Additionally, you will learn techniques to manage your brain activity to increase focus, establish a well-organized business foundation, strengthen relationships, and conserve energy for a more satisfying life. This knowledge will enable you to enhance productivity, profitability, and a positive work atmosphere through operational organization, as well as develop a deeper appreciation of team synchronization.

Together, let's unleash your brain's full potential and revolutionize the way you work!

Meet Samantha

Dental professionals often struggle with maintaining focus amidst distractions and unclear direction, which hinders their ability to develop, lead and contribute to high-performing teams.

Dental professionals often struggle with maintaining focus amidst distractions and unclear direction, which hinders their ability to develop, lead and contribute to high-performing teams. Addressing these challenges, Samantha Jones has dedicated her career to empowering dental professionals to overcome obstacles and excel in their practices. Samantha Jones began her career in dentistry at the age of 16, cultivating her skills in and passion for communication and relationship-building over three decades. By her 20s, she transitioned into a dental practice manager role, focusing on administrative strategies to develop practices and teams. Sam founded her first company, offering support, knowledge, and strategies that contributed to her own success. Simultaneously, she served as the Chief Operations Officer for two dentists who wanted to scale. In just four short years, she played a pivotal role in building the operational infrastructure while her colleagues focused on dentistry, resulting in the remarkable growth of one practice to many practices. One of which was a “from scratch” start-up! This is where she developed administrative and clinical systems that are now utilized in hundreds of practices across the country. This experience provided invaluable insight into the challenges dental teams face today. Specializing in helping owners transform their solo practices into thriving multi-practice entities, Sam recognized that distractions and unclear direction were often the root causes of challenges. Intrigued by the behaviors driving these issues, she obtained an Applied Neuroscience certification to gain a deeper understanding of brain functions and their influence on everyday interactions. The acquisition of this new knowledge compelled her to start a new company that would blend the realms of operations and human behavior. This fusion ultimately gave rise to the birth of Cre8Wise Movement, her innovative and transformative company. Cre8Wise is dedicated to using evidence-based brain science to facilitate insights, direction, and progress in dental professionals' lives and businesses. They do this through Coaching, A Dental Business Playbook, Software that helps a practice go from chaos to organized, and an App that has community based resources and support with experts and peers. Samantha has earned a reputation as an influencer and thought leader in business organization, intentional communication, dental business operations, business scalability, relationship building, team development, and empowering leaders. She is known as the “Maria Kondo of dentistry”. Furthermore, she is the CEO and founder of WOW Readiness Program, which offers career readiness resources and job placement for underserved women. Sam also serves as an expert advisor with Accelerate Dental and holds membership in the Dental Speaker Institute, Dental Speakers Bureau, and Dental Entrepreneur Women's Network.

Rave Reviews

"Sam's programs are a breath of fresh air. She understands the operations and systems necessary to produce not only a profitable practice but a team everyone is excited to support. I highly recommend Sam!" - Peter McClellan, DDS

"Whether it's hiring a rockstar team, creating strong systems, or fostering a healthy and supportive office culture, Sam Jones' programs can help you move your practice to the next level." - Jeff Slutskiy, DMD

"I can't thank you enough for the guidance, and insight! Sam looks beyond numbers and data to see the individuals and team behind the practice. Thanks, Sam!" - Sarah Blair, DDS

"Sam's knowledge and professionalism are second to none." - Lesley Asher

"Sam's programs help dental professionals diagnose the problems in their processes and policies and then implement the systems and strategies which can transform the practice from surviving to thriving. Exceptional!" - Daniel Rome, DDS
